

**Participant Information Sheet (Child)**

We want to find out more about how children learn languages in school. We are interested in finding ways to learn languages using interactive stories online and an app which will teach you how to make French or Spanish sounds.

We'd like you to try our ideas for learning a language because your teacher has already been working with us to find out different ways of teaching French or Spanish.

Your language lessons will continue as normal but sometimes your teacher will give you learning activities that we've made just for you! The stories are online and you can hear real French or Spanish people reading them. The app helps you learn French or Spanish sounds and words. Your teacher will ask you to do some tasks so that we can tell if our teaching ideas work and improve your learning. We will also want to know if you like using our app and stories.

We will collect information from the tasks you do in class. We will write about your language learning for interested people to read but no one will know who you are because you will be given a number instead of your name. Please tell your parent/guardian if you're happy to join in with the research. If you don't want to do the research, please also tell your parent/guardian and they can sign a piece of paper to let us know. If we see this form from them, we will not write about you, although you can still join the new lessons.

Thank you for reading this message!
