

# Trust Me, I'm a Botanist

In this project we are training to become Botanists!

We challenge you to grow something of your own at home. You could try a flowering plant such as a sunflower or a kind of vegetable such as cress, carrots or beans.

We would like you to document your growing experiment through something such as: a diary, photos, videos, or drawings etc.

## Top Tips:

Make sure your plant has all of the essentials it will need to survive:

- Sunlight
- Water
- Air
- Space

**Homelearning due: 25th March 2024**
